

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with experience in MERN stack development, system design, and building scalable web applications. Proficient in Data Structures, Algorithms (DSA), and integrating GenAI solutions to solve complex business challenges. Passionate about writing clean, maintainable code and optimizing frontend/backend performance.

PROFESSIONAL EXPERIENCE

Mern Stack Developer, Krishnaa Soft it Solution - Developed and optimized 20+ scalable backend APIs using Node.js and Express.js, improving application performance, database efficiency, and system reliability for high-traffic web applications. - Built 10+ responsive and reusable frontend modules with React.js and TypeScript, enhancing UI/UX consistency, cross-device compatibility, and user engagement.	01/2026 – Present Indore, India
FULL STACK DEVELOPER INTERN, ALIT TECHNOLOGIES - Developed 8+ responsive web application modules using React.js, Tailwind CSS, and modern JavaScript (ES6+) concepts, improving cross-device compatibility and UI performance. - Optimized 15+ API integrations and client-side routing workflows, ensuring seamless data handling, faster page transitions, and improved application responsiveness.	09/2025 – 12/2025 Indore, India
FRONTEND DEVELOPER, CODEXINTERN - Contributed to 10+ full-stack features by supporting both frontend and backend development tasks using React.js, Node.js, and MongoDB. - Collaborated with cross-functional teams to implement responsive and user-friendly interfaces, improving UI consistency and cross-device compatibility.	08/2025 – 09/2025 Indore, India

TECHNICAL SKILLS

Languages JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3, python	Frontend React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, Mapbox GL JS
Backend Node.js, Express.js, Firebase Functions, REST/GraphQL APIs, Webhooks	Databases MongoDB, PostgreSQL (Neon/RDS), Redis, Firebase Firestore
Cloud/DevOps AWS (EC2, S3), Docker, Vercel, Render, Git, GitHub Actions	Artificial Intelligence Generative AI Integration, RAG (Retrieval-Augmented Generation), SDK Implementation (Groq, OpenAI)
System Design Scalable Architectures, Distributed Systems, API Design, Microservices, Caching Strategies (Redis)	Fundamentals Data Structures & Algorithms, Clean Code (SOLID), Concurrency, Asynchronous Programming

KEY PROJECTS

AI Assisted Compiler & IDE - Integrated Groq AI SDK to provide real-time code optimization suggestions, improving code quality, and helping user to easily understand the code. - Leveraged WebSockets for low-latency live collaboration and session management across concurrent active editor instances. - Create a side by side view to see the code output and the chat suggestion all in place, along with capability to write test cases.	2026
JOB-PORTAL - Developed a scalable full-stack Job Portal platform using React.js, Node.js, Express.js, and MongoDB with secure JWT authentication, role-based access control, and RESTful APIs for employers and candidates. - Implemented advanced job search filtering, candidate/employer dashboards, profile management, and responsive UI/UX optimization, improving application performance, user engagement, and database query efficiency.	2026
TASK MANAGER  - Developed a full-stack Task Management application using React.js, Node.js, Express.js, and MongoDB with complete CRUD operations, RESTful APIs, and secure data handling. - Built responsive and user-friendly UI/UX with efficient state management, task filtering, real-time updates, and optimized frontend performance for seamless user experience across devices.	2025

EDUCATION

Bachelor of Technology in Computer Science & Engineering, SAGE University, Indore CGPA: 7.00	2021 – 2025 Indore, India
--	------------------------------

Certificates

FULL STACK DEVELOPER INTERNSHIP-Alit technologies (December 2025) 

C or Cpp certification-Universal Informatics (September 2024) 

Achievements

Dedicated and disciplined individual with a strong background in leadership and team coordination
